

Important Announcement

As of April 1st 2021, our Atlantic City site has shut down visitation due to increases in community spread of COVID-19 in our region. Our top priority is keeping our patients, families and staff safe. Once community spread is under control, we will re-open visitation and notify all patients and their families.

Certain conditions will continue to apply for limited visitation with authorization prior to visiting.

- Patients with an intellectual, developmental, or other cognitive disability, Acuity invites one designated support person to visit.
- Those at the end stage of life may have two designated visitors at any time unless the patient is diagnosed with COVID-19.
